SEO / GEO / AEO Audit Report

QUICK AUDIT — LOCAL SOURCE & ARCHITECTURE

Audit Date: 2026-09-25
Audited with SEO-GEO-AEO Skill Engine

1. Executive Summary

Rodrigo Martel's portfolio is built on a high-performance modern Next.js App Router foundation with exceptional authentic E-E-A-T credentials (Google, HubSpot, Microsoft, CertiProf) and rich quantifiable case studies. However, the site suffers from three major search visibility bottlenecks: missing Open Graph/Twitter preview images, lack of explicit canonical URL & metadataBase configuration, and unextracted Answer Engine (AEO) FAQ schemas. Implementing these high-impact enhancements will immediately fortify SERP presentation and generative AI citations across Perplexity, ChatGPT Search, and Gemini.

Dimension	Score	Status	Key Takeaway
SEO (Search Engines)	7 / 10	Decent Foundation	Strong titles and clean hierarchy; lacks OG preview image & canonical tag.
GEO (Generative AI)	6 / 10	Decent Foundation	Rich metrics & accredited E-E-A-T; lacks structured credential entities in schema.
AEO (Answer Engines)	5 / 10	Needs Attention	Clippo Q&A knowledge is not exposed to web crawlers; missing FAQ schema.
Combined	18 / 30	On Track (60%)	Solid technical stack with immediate low-hanging conversion wins.

2. Pages & Routes Audited

Route / File	Type	Status & Findings
app/page.tsx	Homepage / SPA	Complete showcase with Hero, About, Projects, Experience, Certs, Contact.
app/layout.tsx	Root Layout	Houses Person JSON-LD, fonts, Clarity analytics, and global meta tags.
app/robots.ts	Robots Directives	Disallows /private/ and /api/; references sitemap.xml. Valid.
app/sitemap.ts	XML Sitemap	Indexes root URL weekly with priority 1.0. Valid.

3. SEO Analysis (Score: 7/10)

Technical On-Page & Meta Tags

Signal	Finding	Status
Title Tag	56 characters: "Rodrigo Martel Marketing Operations & Systems Specialist". High relevance, optimal length.	Good
Meta Description	166 characters: Informative and keyword dense (Make, Zapier, Python, Salesforce, HubSpot).	Good
Open Graph Image	Missing og:image in metadata. Shares on LinkedIn/Twitter will lack thumbnail previews.	Missing
Canonical Tag	Missing metadataBase and alternates.canonical in layout.tsx. Potential duplicate URL indexing.	Needs Attention
Heading Structure	Single semantic H1 in Hero (sr-only), clean H2 section labels with SectionLabel component.	Good
Image Alt Text	All executive portraits and project media cards have descriptive alt attributes.	Good
Structured Data	Person schema present, but contains invalid empty string "alumniOf": "". Missing credentials.	Needs Attention

4. GEO Analysis — Generative Engine Optimization (Score: 6/10)

E-E-A-T & AI Engine Synthesis

Signal	Finding	Status
E-E-A-T Signals	Verified accredited issuers (Google, HubSpot, Microsoft, CertiProf) with real-world timeline (2018–2025).	Strong
Factual KPI Density	Quantifiable metrics throughout (4,200+ tasks, -35% dropoff, +18% accuracy) giving AI engines rich citation hooks.	Strong
Entity Grounding	Clear brand identity ("Rodrigo Martel") and role definition, with social profile links (sameAs).	Good
Credential Schema	Credentials are only rendered in UI; not exported into Schema.org hasCredential array.	Missing
AI Search Definitions	Lacks explicit definition callouts ("What is Marketing Operations?", "How do CRM pipelines integrate?").	Needs Attention

5. AEO Analysis — Answer Engine Optimization (Score: 5/10)

Featured Snippets & Direct Answers

Signal	Finding	Status
Direct Answer Snippets	Content is tailored for narrative & visual scrollytelling; lacks 40-60 word definition snippets under question headings.	Needs Attention
FAQ Schema	No FAQPage schema markup exists on the page. Missing opportunities for People Also Ask (PAA) carousels.	Missing
Conversational Q&A	Clippo chatbot has extensive Q&A knowledge, but it is client-rendered and not indexed by Googlebot or voice engines.	Needs Attention
High-Intent Actions	Direct links for WhatsApp booking, Gmail webmail, and schedule calls are prominently placed.	Good

6. Priority Recommendations Matrix

Priority	Actionable Recommendation	Dimension	Effort	Impact
Critical	Add Open Graph & Twitter share images + configure metadataBase & canonical URL in layout.tsx.	SEO	Low	High
High	Clean JSON-LD Person schema (remove empty alumniOf) and inject EducationalOccupationalCredential for verified issuers.	GEO	Low	High
Medium	Expose high-intent FAQ questions & answers in structured FAQPage JSON-LD schema for PAA eligibility.	AEO	Medium	High
Quick Win	Trim meta description to 155 characters to ensure zero snippet truncation in mobile search results.	SEO	Low	Medium

7. What's Working Well

- **Authentic E-E-A-T Positioning:** Avoids fake enterprise software buzzwords; grounds technical skills as pragmatic business enablers.
- **Verified Accredited Credentials:** Highlights top-tier issuers (Google, HubSpot, Microsoft, CertiProf) with verifiable validation links.

- **High-Performance Modern Next.js Architecture:** Clean dynamic robots.ts, sitemap.ts, semantic typography, and 100% passing automated test suites.
- **Conversational High-Intent Conversion Flow:** Streamlined direct WhatsApp, Gmail compose, and schedule call actions avoiding cumbersome forms.
